

## Login/Signup

These Login/Signup screens are designed in Adobe Photoshop CS4, and to be used for your projects of web application and or website. You can modify or can change their colors according to your project theme. Each Login/Signup design is layered and categorized in layer groups. These are in the quantity of ten.

Here are few things to be noted:

- 1- **Layer Grouping** is done for your ease of use, so you can see initially 10 groups of layers from "login-1" to "login-10" further more layers can be found in sub-groups.
- 2- **Vector shapes** are used mostly for your ease of editing and image quality.
- 3- **Error Messages** are included in each login design that are initially hidden having group name "Error" so by making it visible you can see its error state.
- 4- **Fonts**, in most of the designs standard fonts are used but in few designs some non-standard fonts were used that is from "Swiss Family" and some others but you can use the fonts according to your project theme of design.

Here are links for fonts where you can get free and or by purchasing:

- a. <http://www.acidfonts.com/afonts1.htm>
- b. <http://new.myfonts.com/fonts/bitstream/swiss-721/>
